Professional Experience

Composite Apps

UX / Product Designer • Oct 2018 - Present

Designed SaaS healthcare solution from the ground up, resulting in +$2 million in investments and clients including VA Washington DC and Long Beach. Led the design process and guided software life cycle from initial personas and user journeys to prototyping and developer hand-off.

Collaborated with sales in securing new $1.2 million student health insurance system; managed client relations from initial ideation to deck presentations, blueprint sessions, and final PO.

Managed team of 3 designers and 5 developers across 3+ projects using Agile Scrum methodology and Trello for task management.

University of California, San Diego

UX/UI Design Contractor • July 2018 - Oct 2018

Drafted mockups and created high-fidelity prototypes for the UCSD Mobile App. Conducted user research with students and professors for upcoming features. Updated design guidelines and created new components for developer hand-off.

Veritone

Student Designer & Developer • Jan 2018 - Jun 2018

Designed web app for new image recognition engine.
Crafted high-fidelity mockups and converted to InVision prototype.
Collaborated on React JS development of web app's front-end.

Carrie Forbes

Web Designer & Developer • Jan 2017 - Jun 2017

Redesigned and developed legacy site into modern storefront.
Managed email campaigns and customer service.
